Harari is an influential member of the World Economic Forum (WEF) who supports the idea of creating a dystopian society managed by a handful of globalists who will rule over every human being on earth from the day they are born. According to Harari, planet earth is overpopulated: Again, I think the biggest question in maybe in economics and politics of the coming decades will be what to do with all these useless people? The problem is more boredom and how what to do with them and how will they find some sense of meaning in life, when they are

basically meaningless, worthless? My best guess, at present is a combination of drugs and computer games as a solution for [most]. It's already happening...In under different titles, different headings you see more and more people spending more and more time or solving the inner problems with the drugs and

computer games both legal drugs and illegal drugs... They also want people to stay home connected to the Metaverse world, a virtual reality simulation and at the same time get them addicted to all

sorts of drugs. The kind of world they are trying to create for us is pure lunacy. Wired, a monthly magazine describes the metaverses as a combination of the digital and physical worlds that creates a virtual reality as in the Hollywood film, 'Ready Player One,' The article 'What is the Metaverse, Exactly?' answers that question, "Broadly speaking, the technologies companies refer to when they talk about "the metaverse" can include virtual reality—characterized by persistent virtual worlds that continue to exist even when you're not playing—as well as augmented reality that combines aspects of the digital

Many other Hollywood films that are based on virtual reality in the future includes Jumanji, Source Code, The Matrix, Total Recall, Inception, and many others. The globalists want you to believe that a dystopic society is in the works for us, but no worries, you will be completely happy at least according to Klaus

Schwab. The pandemic In my opinion, the notion that the human species will be living their lives through virtual reality is farbut narrow fetched, it's an illusion that will take decades even centuries to accomplish and that would only happen if window of

represents a rare we allowed it to happen. opportunity to reflect,

reimagine, and

Professor Klaus Schwab

reset our world."

Harari is saying that under a scientific, technocratic world order, the state will be your sole provider for everything, so basically, he says that families are not needed in this new world they are creating for **us**, in other words, having a family will be a thing of the past: After millions of years of evolution suddenly within 200 years the family and the intimate community

break, that they collapse most of the roles filled by the family for thousands and tens of thousands of

fund, you don't need somebody to take care of you, you don't need neighbors and sisters or brothers to take care of you if you're sick, the state takes care of you, the states provide you with police, with education, with help with everything Listen to Harari's own words in this video:

years are transferred very quickly to new networks provided by the state and the market, you don't need children, you can have a pension

and physical worlds."

taxes and regulations to attract foreign investments to grow their economies, so the WEF 's recommendations will never work, in fact its dead-on arrival. Then there is the looming financial crisis that can ultimately force the world into a Federal Reserve Bank "Digital Currency" known as central bank

digital currencies (CBDCs) that will be tracked by the government on how you spend your money. What can go wrong with this idea?

How would this work? There are more than 195 countries in the world meaning that all these countries would have to establish a "unified" tax,

regulatory and fiscal policy, all in sync, all with the same laws and that would be impossible even if they tried because all countries have different tax systems, different economies and cultures and that will not change because of a handful of globalists with outlandish ideas of a unified

financial system they want to control for their own benefit. It's a ridiculous idea. In fact, more countries today are more open to imposing less

An article published by Stefan Gleason who is an investor, political strategist, and grassroots activist wrote an interesting analysis last year for fxstreet.com titled 'The Great Reset is Coming for the Currency' asks what will be the next major issue for a Global Reset? "As the Great Reset proceeds from globalist think tanks and technology billionaires to allied media elites, governments, schools, and Woke corporations, what will be "reset" next? The next reset will most likely take place in the financial sector as "Supporters of the World Economic

If in any case, you are not politically aligned with a particular party or refuse an experimental injection, then the government may block your transactions. In other words, they can literally control when and how you spend your money and that is something most people will not accept.

International Monetary Fund (IMF) issue CBDC's. "Yellen derided Bitcoin as "an extremely inefficient way to conduct transactions" because "the amount of energy consumed in processing those transactions is staggering." Gleason says that Yellen and her colleagues are planning to have the public use digitized tokens issued by the central bank. The bottom line is that "They just want to make sure those digits are issued and controlled by governments and central banks."

"Anyone who is concerned about the prospect of being herded into a new digital currency regime should make it a high priority to own tangible

Biden's Treasury Secretary and former Federal Reserve Chair, Janet Yellen wants to end the use of various cryptocurrencies and have the

Gleason makes the case for owning gold and silver, "No technology or government mandate can change the fact that gold and silver have universally recognized, inflation-resistant value."

The best way to avoid the Federal Reserve bank's control over your finances is to own gold, silver, and other safe-haven assets.

Forum's all-encompassing Great Reset agenda are eyeing BIG changes for the global monetary system."

Great news just came out of Geneva. We

informed you about a meeting of the World

Health Organisation that took place this past

The second component "would ensure that investments advance shared goals, such as equality and sustainability. Here, the large-scale spending programs that many governments are implementing represent a major opportunity for progress."

Which means that governments will be required to print an unlimited money supply to support their agenda that will eventually lead to inflationary

"Here, the large-scale spending programs that many governments are implementing represent a major opportunity for progress. The

Rather than using these funds, as well as investments from private entities and pension funds, to fill cracks in the old system, we should use them to create a new one that is more resilient, equitable, and sustainable in the long run. This means, for example, building "green" urban

At some point, the public will reject the Federal Reserve and its 'digital currency' if they can avoid it. However, the best way to bypass CBDC's in

the future is to buy gold, silver, and other metals that that can maintain value and become resistant to inflationary pressures. An important note to consider is that all US silver coins that were produced before 1964 were minted with 90% silver and 10% copper, so keep an eye on your pocket-

European Commission, for one, has unveiled plans for a €750 billion (\$826 billion) recovery fund. The US, China, and Japan also have ambitious economic-stimulus plans." They are pushing for an expensive Green Agenda which is part of Joe Biden's Build Back Better plan to reduce greenhouse gas emissions that will change how the world operates when it comes to using traditional energy resources such as coal, oil, and natural gas:

and unreliable scheme: The vast majority of human beings want high rather than low economic growth, and so politicians ultimately choose policies that make energy cheap, not expensive.

infrastructure and creating incentives for industries to improve their track record on environmental, social, and governance (ESG) metrics

Last year, Forbes magazine published 'Why Biden's Climate Agenda Is Falling Apart' which does explain how the Green Agenda is an expensive

And the limitations of weather-dependent renewables are more visible than ever. If California's large wind energy project is built, it will provide less than half of the energy of California's Diablo Canyon nuclear plant Newsom is planning to close in 2025, and it will be unreliable. During the heatwave-driven blackouts last summer, there was little wind in California or other Western states, meaning we can't count on wind energy when we need it most.

In other words, the Democrats' climate change and renewable energy agenda is rapidly falling apart, and the reasons have far more to do with

physics than with politics Schwab proposes that the third component is basically the innovations that will lead to centralized control of the world's health policies by the World Health Organization (WHO). However, the innovations began the moment WHO officials declared a global Public Health Emergency more than 2 years ago.

"shapes new policies and strategies in areas such as artificial intelligence, blockchain and digital assets, the internet of things or autonomous vehicles, and enables agile implementation and iteration via its fast-growing network of national and sub-national centres." Regarding Covid-19 or any other declared public health emergency in the future, the new system will be able

Schwab mentioned the 'Fourth Industrial Revolution' which is described on the World Economic Forum's website as a new system that

others have joined forces to develop diagnostics, therapeutics, and possible vaccines; establish testing centers; create mechanisms for tracing infections; and deliver telemedicine." However, there was a unified response put forward by a several nations including Brazil, India, Russia, China, Iran, South Africa, Malaysia and the

"to support the public good, especially by addressing health and social challenges. During the COVID-19 crisis, companies, universities, and

practically the entire continent of Africa that rejected a pandemic treaty developed by the World Health Organization. They all agreed that the treaty would allow authorities from the WHO to gain control of their health policies bypassing their rights as sovereign nations. As the spirit of Tanzania's late President, John Magufuli lives on, Reuters published the positive move on behalf of the African continent 'Africa'

objects to U.S. push to reform health rules at WHO assembly' regarding Africa's 47 nations who rejected the treaty "African countries raised an

objection on Tuesday to a U.S.-led proposal to reform the International Health Regulations (IHR), a move delegates say might prevent passage at the World Health Organization's annual assembly." The treaty brought forward by the WHO and the US government was technically defeated which is a positive outcome considering what's at stake: If Africa continues to withhold support, it could block one of the only concrete reforms expected from the meeting, fraying hopes that members

will unite on reforms to strengthen the U.N. health agency's rules as it seeks a central role for itself in global health policy.

of the rules. But the African group expressed reservations about even this narrow change, saying all reforms should be tackled together as part of a "holistic package" at a later stage

The IHR set out WHO members' legally binding obligations around outbreaks. The United States has proposed 13 IHR reforms which seek to authorise the deployment of expert teams to contamination sites and the creation of a new compliance committee to monitor implementation

week in Geneva from the 22-28 May 2022 where some legally binding US Amendments to the International Health Regulations were to be signed.

Totalitarian social control is not the remedy for any crisis. Let's not make democracy and freedom one more victim of COVID-19 Is the World Ready to Embrace the Great Reset? In the geopolitical spectrum, globalists are set on punishing sovereign countries who do not obey a rules-based order under the Great Reset agenda in partnership with the US-NATO alliance leading the world to some form of conflict or regime change against Russia, China, Iran, Belarus,

Syria, Venezuela, Nicaragua, Cuba, and any other nation who wants to remain sovereign at all costs. There are many who are vehemently opposed to such an idea, for example, on January 27th, 2021, Russian President Vladimir Putin spoke at the World Economic Forum (WEF) and

basically rejected the idea of the Great Reset and gave a reasonable idea of humanity working together to achieve a prosperous future for all with

This is how it should be, and this is an absolutely correct view of our joint efforts" and that "It is clear that the world cannot continue creating

an economy that will only benefit a million people, or even the golden billion. This is a destructive precept. This model is unbalanced by default." Putin's perception of the Great Reset or a unipolar world order is correct because it is destined for failure since the world is a complex place where

nations have distinct cultures and history. Putin questions how nations would respond to a Great Reset with a rules-based order run by an elite

We are open to the broadest international cooperation, while achieving our national goals, and we are confident that cooperation on matters

The reality is such that really different development centers with their distinctive models, political systems and public institutions have taken shape in the world. Today, it is very important to create mechanisms for harmonizing their interests to prevent the diversity and natural

The rejection of the Great Reset and its associated global institutions and industries such as the WHO, NATO and Big Pharma is a step in the right direction and the globalists are in panic. Brazil, Russia, the continent of Africa and others are proving that the Great Reset or that century's old idea of a New World Order has become a failed project. Some people might disagree with my analysis because many are pessimistic about their

future because they believe that a Great Reset is inevitable, that there is no escape from it because it seems that things are getting out of control

However, I do believe that we are in the early stages of a great awakening, not a rules-based order managed by a group of globalists despite the

"calls for inclusive growth and for creating decent standards of living for everyone are regularly made at various international forums.

group of psychopaths that expect a harmonious transition from all nations who are willing to comply:

Fundamental freedoms are not an ideology. Human dignity requires freedom as much as it requires health and economic opportunities. Those who dislike freedom always try to benefit from moments of crisis to preach the curtailing of freedom. Let's not fall for that trap.

of the global socioeconomic agenda would have a positive influence on the overall atmosphere in global affairs, and that interdependence in addressing acute current problems would also increase mutual trust which is particularly important and particularly topical today. Obviously, the era linked with attempts to build a centralized and unipolar world order has ended. To be honest, this era did not even begin. A mere attempt was made in this direction, but this, too, is now history. The essence of this monopoly ran counter to our civilization's cultural and historical diversity.

People and certain governments are awakening to the fact that a group of globalists are working against them on every level, and they are starting to fight back. We do not want to be ruled by a centralized power telling us what to do or how to think. The concept of the Great Reset has failed in many ways, but there is still work to do. Never give up, never allow a group of influential globalists whether they are billionaires or bankers, government bureaucrats or special interest

groups, resist this ideology of a unipolar world order. We can win this war, there is still time, I believe that we will prevail if we just don't comply
